

Bilateral Development Cooperation of the Czech Republic in Cambodia

The Czech Republic and Cambodia have historically very good relations and a tradition of mutual cooperation, especially in the field of health and education. In the last 7 years the Czech Republic's official development assistance (ODA) has been concentrated in particular on projects that bring direct benefits to specific target groups.

Given the priorities set by the Cambodian Government, the Bilateral Development Cooperation Program of the Czech Republic for the years 2018-2023 focuses on education, health and water and sanitation.

HEALTH – reduce preventable neonatal mortality and mortality in children under five years of age and to reduce maternal mortality in selected locations in the target province

EDUCATION - equal access of women and men to good quality, affordable and inclusive technical, vocational and higher education including university education

WATER AND SANITATION - universal and equal access to safe and affordable drinking water, adequate sanitation and hygiene for all in selected locations in the target province
