

Art In Context MFA at the Academy of Fine Arts in Prague

31 March *Application Deadline*

**Academy of Fine Arts in Prague/Akademie výtvarných umění v Praze
U Akademie 4
Praha 7, 170 00
Czech Republic**

Art in Context is an entirely new accredited small-scale international MFA program aimed at deepening students' skills & collaborative competencies in art practices across various visual arts media and theory.

The Art in Context curriculum combines continuous studio and post-studio practice with collective seminars, projects and individual instruction by a dynamic, inclusive and internationally renowned team of artists, performers, theorists and thinkers. The thematic frameworks are built on the basis of mutual exchange between students and instructors. Two years of intense international learning culminate with a final third year focused around the creation of a diploma work and its public presentation.

Along with studio work, the Art in Context program offers courses in artistic research and writing, plus lectures in art history and critical theory. Our students are provided access to all the artistic and scientific departments and workshops at the oldest art school in the Czech Republic and benefit from exchanges with a unique and diverse community of students, alumni, artists, curators and art professionals from the Academy of Fine Arts in Prague.

Studio spaces are situated in a charming heritage-protected Art Nouveau building (the Šaloun Studio) in the heart of the cosmopolitan city of Prague.

The Academy of Fine Arts in Prague is an autonomous state university constituted on the principles of transparency, the promotion of democratic standards, diversity, inclusion, and equity, and is committed to following sustainable practices.
